

# Antioxidant Alkaline Water Pot with Biocera Cartridge

## Function

1. 3 stage purification
2. Carbon filter absorbing/elimination any remaining chlorine & other organo chemical from the water
3. Sediment filter effectively eliminates dust, bits of rust & other impurities
4. Biocera Alkaline Filter makes Anti Oxidant Alkaline water with an ORP (Oxidation Reduction Potential) of (-100mV to -250mV)
5. Change Normal Water to Anti Oxidant Alkaline Water with a pH of 7.0 ~ 8.5 pH
6. Add minerals in water like calcium, magnesium, potassium, Sodium and other trace minerals which help to balance the body metabolism
7. Reduced water cluster size for superior hydration
8. Remove harmful active oxygen (Free Radical Oxygen)
