WateriZER

BATHROOM WATER CONDITIONER

Specifications

Brand	WateriZER
Dimensions (Metric)	120mm x 315mm
End Modifications	Sealed Housing
Flowrate (Metric)	60lts per min
Applications	Bathroom
Inlet / Outlet Size	13mm NPT
Maximum Operating Tem. (Celsius)	36.5° c
Temperature Range (Celsius)	4.5-36.5° c
Overall Diameter (Metric)	90mm
Overall Length (Metric)	460mm
Overall Width (Metric)	172-862kPa
Pressure Range (Metric)	Gravity Line (0.5 - 1 Bar)
Replacement Interval	No Replacement
Product Series	BWC
Claims	Improved Lather, Smooth Hair Increased DO, Water Disinfection Reduces Calcium Scale Deposits

Protection Hardwater Se

DISINFECTS & AVOIDS FURTHER MICROBIAL GROWTH

IMPROVED LATHER

SMOOTHER HAIR

LESSER USE OF SOAP & DETERGENT

BETTER LINEN WASH

SOFT FEEL OF WATER

ENHANCED WETTABLE PROPERTY

REDUCES CALCIUM SCALE DEPOSITS

WaterIZER

BATHROOM WATER CONDITIONER

Working Principle

WORKS ON THE PRINCIPLE OF FLOW DYNAMICS.

MACRO MOLECULAR CLUSTERS OF CALCIUM ARE BROKEN INTO MICRO CLUSTERS

RELEASES SILVER IONS IN WATER, WHICH DISINFECTS WATER

Optimal Release of Silver ions

SILVER IONS IN WATER

Eliminates **Microbes**

**WHO Recommends
Ag⁺ for Disinfection
of Water**

Optimal Release of Silver ions

Disinfects & Avoids Further Microbial Growth
